

Excerpts from Sri Kaleshwar Teaching Transcripts about *Power Spots*

1. Sri Kaleshwar Teaching from the Holy Womb Transcript

(Pages 19-20)

Swami: I have a question to make sure everybody understands. I have a question, what does it mean by power spot? Clint?

Clint (Nityaananda): It's a place that utilizes the earth element that's connected to our soul. And it's a link between our soul and the guru, the master's soul. And it's the place where our austerity power is stored like a bank account. It's a place that link is related to our blocks, how to stay washed. It's related to our personal mantra. It's related to discharging negativity. It's related to the ability of the Guru's sankalpam to act on our soul. It's absolutely necessary for protection in the world from the illusions, the maya. If we're doing healings, it's a place where we access the austerity energy that is actually doing the healing. It's completely necessary in spirituality as we are being taught.

Swami: Why is it necessary? Try to understand why I'm asking these questions. Why is it necessary to have a power spot?

Clint (Nityaananda): Well, it implements the most powerful of the five elements, the earth element. That's the most stable element we can link to. Without that link we don't have the connection to the guru sankalpam or to discharge our energy.

Swami: What do you mean by sankalpam?

Clint (Nityaananda): Well, the guru understands what blessings each soul can receive and needs to receive. The guru understands the dharma. So the blessings the guru gives us is focused in the way of sankalpam. You put your sankalpam on a soul you know what the soul is going to do, should do, can do. And so you bless that with energy. But that energy is focused through your Brahma Consciousness and your awareness in a way, in a specific form in the Creation. That's through sankalpam.

Swami: Why do you need to visit five times to your power spot?(Note: Visiting Penukonda ashram every Guru Purnima for five years is a requirement for having a Personal Power Spot in Penukonda,a) Monika? What is the inner mechanism you have to come every Guru Purnima Full Moon to touch the spot? What is important?

Monika: Well, I don't know the exact answer to that. I think there might be something about our physical body, our five elements have to touch the five elements that are there. And once we develop our channels then the soul can travel there. But for the first five years while developing our channels our physical body needs to come and touch that.

Swami: Is it true, Clint?

Clint (Nityaananda): You said we need to come with our body until we can soul travel. So actually I think our body is bringing our soul; a link to our soul through the five elements to that place. It's really about the soul. We come, we deposit, we discharge, we put all our austerity power for the whole year there and we reconnect and charge our personal mantra. You said the power spot is automatically like interest, whatever energy there is going up every six months 10 times going higher.

(Page 26)

Swami: The most, most, most, most important thing is for you keep doing your personal process, then the responsibility to take care of all your thing is the master's. That's his job to take care of you. You're doing your process. But there are only certain things I can do. If you're really starving, you're really thirsty, I'm not the person to give water to you. But if you're really thirsty on the soul level I'm the only person to give it to you. If you have complete 100% faith on your process, then automatically you'll receive all the protection from your power spot, from your power object, and once you made your soul object, done. If you know your personal mantra is strong, you did it, you can pull the things in front of you.

2. Excerpt from a dialogue between Sri Kaleshwar and Monika during a 90-Day JC Program public talk in Penukonda, India. (September 4, 2010)

Monika: Swami, how do we use the 2nd JC Channel to create a power spot with our power objects?

Swami: Ahhhh. Ah ha. What do you mean? Give me an example.

Monika: We charged the channel. Now we're going to our home countries and need to know, how do we create a power spot in our home countries?

Swami: No, you cannot create it in your home countries. Only you can create the power spot only in Penukonda. This is your gurusthan. This is? Your gurusthan. No. Your country, I traveled Switzerland, Germany, Singapore, Singapore, Denmark, Amsterdam, America, Japan, all countries. No. There is no depth country vibration. No. I love all the countries and all the citizenships, but power spot, if there's anywhere existing 365 temples, yes you can create it there. The Fort, it's not a joke. Around the Penukonda it's a huge fort. Only Penukonda. You can make a second Shirdi in Germany? You can? You cannot. Shirdi is Shirdi. Tirupati is Tirupati. Lord Venkateswara is Lord Venkateswara. Leave it. That's their power spots. You need to access that power spot. You be a small flower to there. And me too.
